

Slope is a Blunt Tool

And not Fit For Purpose

Allowable
as slope is
<15 deg

Allowable
on slope
>15deg
as it is
forestry

Not
allowable
as slope is
>15deg
(my
estimate is
average
20deg)

85% runoff exits via a quality nutrient stripping wetland.

Careful grazing of young animals at a light stocking rate should be permissible even on land of slope greater than 15 degrees.
