Foreword

The Waikato River Authority's enabling legislation has given it an important role as the custodian of the Vision and Strategy for the Waikato River.

The Authority has two main aspects to its work. As the sole trustee of the Waikato River Clean-up Trust, it is able to fund projects that contribute to the health and wellbeing of the river. The Authority is also charged with safeguarding the importance of the Vision and Strategy in policy that relates to the health of the river.

The task ahead is significant with the Vision and Strategy applying to 11,000 square kilometres of Waikato River catchment and the government contributing \$220 million over a 30-year period.

Because restoring and protecting the Waikato River is such a long-term undertaking, the Waikato River Authority will also work towards the creation of an endowment fund so that the river clean-up work can carry on in perpetuity.

Collaboration is crucial for a cleaner river. Waikato River iwi, industry, central and local government and of course the wider community all have a key role to play now and into the future.

Kia ora

BACKGROUND

The Waikato River Authority was established in 2010 as the custodian of the Vision and Strategy for the Waikato River. The Authority is also the body responsible for overseeing the implementation of the clean-up of the river.

The Vision and Strategy was developed and published in 2008 under the watch and direction of the Guardians Establishment Committee. Consultative hui, public open days and meetings with stakeholders with an interest and connection with the Waikato River were held. In addition submissions were called for and received which guided the formation of the Vision and Strategy.

THE VISION AND STRATEGY RESPONDS TO FOUR FUNDAMENTAL ISSUES AS SET OUT BELOW:

1. The degradation of the Waikato River and its catchment has severely compromised Waikato River iwi in their ability to exercise mana whakahaere or conduct their tikanga and kawa;
2. Over time, human activities along the Waikato River and land uses through its catchments have degraded the Waikato River and reduced the relationships and aspirations of communities with the Waikato River;
3. The natural processes of the Waikato River have been altered over time by physical intervention, land use and subsurface hydrological changes. The cumulative effects of these uses have degraded the Waikato River; and
4. It will take commitment and time to restore and protect the health and wellbeing of the Waikato River.

The Vision is consistent with the overarching purpose of the settlement between Waikato-Tainui and the Crown to restore and protect the health and wellbeing of the Waikato River. The Vision and Strategy incorporates the objectives provided by Waikato-Tainui as set out in the Agreement in Principle, and other objectives that reflect the interests of Waikato River iwi, and of all New Zealanders.

As the Waikato River is important to all the people of the region, the ultimate measure of this Vision and Strategy will be that the Waikato River will be safe for people to swim in and take food from over its entire length.

Vision AND Strategy

Our Vision
is for a future where a
healthy Waikato River
sustains abundant life and
prosperous communities
who, in turn, are all
responsible for restoring
and protecting the health
and wellbeing of the
Waikato River, and all it
embraces, for generations
to come.

This Vision and Strategy
is Te Ture Whaimana o
Te Awa o Waikato

Tooku awa koiora me oona pikonga he kura
The river of life, each curve more
tangihia o te maataamuri
beautiful than the last

These words form part of the Vision and are taken from the maimai aroha, or lament, by Kiingi Taawhiao, the second Maaori King, in which he recorded his adoration for the Waikato River and the significance of the river as a treasure for all generations. These visionary words inspire the actions that will be necessary to restore the health and wellbeing of the Waikato River.

In order to realise the Vision, the following Objectives will be pursued:
